

## The power of compound interest

Author: [fourpillarfreedom.com](http://fourpillarfreedom.com)

We underestimate the power of compound interest towards the tail end. The chart below shows how long it takes to reach different \$100k net worth milestones by saving and investing \$10,000 each year at a 7% annual rate of return. Notice how it takes less time to go from \$600k to \$1 million than it does to save the first \$100k.
